MD MAJEDUR RAHMAN

Blockchain Developer | Smart Contracts, EVM, Solana & Web3 Backend

+880 1825 947056 majednitol708@gmail.com in/md-majedur-rahman
github.com/majednitol Dhaka, Bangladesh

Blockchain developer with professional and project-based experience designing, developing, testing, and deploying **smart contracts** and full-stack blockchain systems across **Cosmos EVM**, **EVM**, and **Solana**. Led and delivered the majority of technical implementation across three **EtherAuthority** projects: a **Solana-mainnet DEX and token ecosystem**, a **34-network React Native/Expo crypto wallet** in pilot testing, and a **Cosmos SDK EVM-compatible blockchain** in final testing ahead of a planned market launch. Built smart contracts and backend infrastructure using **Solidity**, **Rust/Anchor**, **Go**, **TypeScript**, **Node.js**, **PostgreSQL**, **Redis**, **Nginx**, and **Docker**.

TECHNICAL SKILLS

Smart Contracts & Blockchain:	**Solidity**, **EVM**, **Ethereum**, **Solana**, **Rust**, **Anchor**, **Cosmos SDK**, **CometBFT**, **CosmWasm**, **Hyperledger Fabric**, Go Chaincode, **IBC**, **DeFi**, ERC-20, ERC-721, ERC-1155, SPL Tokens, Token-2022, **multisig governance**
Smart Contract & Web3 Tools:	**Hardhat**, **Foundry**, **OpenZeppelin**, **Ethers.js**, Web3.js, **Gnosis Safe**, Biconomy, Alchemy, **IPFS**, Arweave, Irys, Hyperledger Caliper
Backend, APIs & Data:	**TypeScript**, JavaScript, **Node.js**, **Go**, **Fastify**, Express.js, **REST APIs**, **gRPC**, GraphQL, Apollo Server, **WebSockets**, **PostgreSQL**, MongoDB, **Redis** (caching, pub/sub), **NATS JetStream**, LevelDB
Frontend & Mobile:	**React**, **Next.js**, **React Native**, **Redux Toolkit**, Material UI, Tailwind CSS, Vite, **Expo**, React Native Paper
Infrastructure, Deploy & Security:	**Docker**, **Kubernetes**, **Nginx**, DigitalOcean, **Grafana**, **Prometheus**, Jest, **smart contract security review**, vulnerability analysis, JWT, OAuth 2.0, biometric auth, RBAC

PROFESSIONAL EXPERIENCE

Blockchain Developer
Dec 2025 - Jun 2026 (Full-time) | Jul 2026 - Present (Project-Based)

EtherAuthority — Remote

- Owned and delivered the majority of the technical implementation across three projects: a **Cosmos SDK EVM-compatible blockchain**, a **Solana DEX and token ecosystem**, and a **multi-chain crypto wallet mobile application**.
- Developed and deployed smart contracts and blockchain programs across **Cosmos EVM**, **Solidity/EVM**, and **Solana Anchor/Rust** environments, including devnet/testnet and mainnet deployments.
- Designed and implemented backend services and REST APIs using **Go**, **TypeScript**, **Node.js**, and **Fastify**, with **PostgreSQL**, **Redis caching**, **NATS JetStream**, **Nginx**, and **Docker**.
- Built Solana DEX and token-launchpad infrastructure with a **TypeScript SDK**, **Anchor programs**, **Orca Whirlpools** and **Raydium** integrations, **Squads v4 multisig governance**, and automated liquidity workers.
- Developed a **React Native/Expo mobile wallet** supporting **34 networks**, user-configurable network addition, **EVM and Solana assets**, ERC-20 and SPL token transfers, NFTs, **biometric unlock**, auto-lock protection, and multi-account management; the wallet is currently in pilot testing.
- Contributed to React and React Native UI development and integration; performed **smart contract security reviews** and **vulnerability analysis** where required.

Co-Founder & CTO
Feb 2024 - Present | Pre-launch development

Patient Bio (Early-Stage Startup) — Full-time

- Lead product architecture and development for an early-stage **decentralized healthcare platform** currently in pre-launch development.
- Translate product requirements into **technical architecture**, **engineering practices**, and an **execution roadmap**.
- Lead development from **research and prototyping** through **product implementation** and **launch readiness**; manage a distributed team and coordinate engineering execution.

BLOCKCHAIN PROJECTS

Sovereign — Cosmos SDK EVM-Compatible Blockchain | LINK
Independent Lead Developer | Final testing; preparing for launch

- Independently owned, architected, developed, and completed the **end-to-end blockchain project** from protocol design through backend services, infrastructure, testing, and application integration.
- Built a **Cosmos SDK blockchain** combining **CometBFT consensus**, **Cosmos EVM compatibility**, **CosmWasm smart contracts**, **IBC interoperability**, and **dual Solidity/Rust execution**.
- Designed custom modules for **validator certification**, **validator power equalization**, **price oracles**, **milestones**, **settlement**, **bridging**, **governance extensions**, **ERC-20 bridging**, and **EIP-1559 fees**.
- Built a **BSC bridge** with **Solidity LockBox escrow**, **Gnosis Safe governance**, a **Go relayer**, **threshold signing**, and **circuit-breaker controls**.
- Developed **CQRS backend services**, **REST/gRPC APIs**, **NATS JetStream**, **PostgreSQL**, and **Redis data pipelines**; built a **45+ page explorer** and **34 E2E test files**.

Tech: Go, Cosmos SDK, CometBFT, Cosmos EVM, Rust, CosmWasm, Solidity, Foundry, IBC, TypeScript, NATS JetStream, PostgreSQL, Redis, Docker, Kubernetes

Solana DEX, Token Launchpad & Liquidity Ecosystem | LINK — Deployed to Solana mainnet

- Built an end-to-end **Solana DEX**, token launchpad, **Squads v4 governance**, and automated liquidity ecosystem using **Anchor/Rust smart contracts** and a **TypeScript SDK**.
- Implemented **versioned transactions** with **Address Lookup Tables**, configurable priority fees, **WebSocket signature confirmation**, and **Jito bundle submission**.
- Built a **Fastify REST API** with **PostgreSQL**, **Redis caching**, and background workers for swaps, token creation, liquidity, price feeds, metrics, governance, referrals, and automated fee collection.
- Integrated **Orca Whirlpools**, **Raydium pools**, **Irys/Arweave metadata storage**, and **Solana Token-2022** functionality.

Tech: Solana, Anchor, Rust, TypeScript, Node.js, SPL Tokens, Token-2022, Orca Whirlpool, PDA, Fastify, PostgreSQL, Redis, Docker

Custom Crypto Wallet Mobile App | LINK — Pilot testing

- Built a **React Native and Expo wallet** supporting **34 networks**, EVM and Solana assets, user-configurable network addition through Settings, wallet creation/import, multi-account management, native asset transfers, **ERC-20 and SPL token transfers**, and **NFTs**.
- Implemented **biometric unlock**, password fallback, configurable auto-lock protection, and persisted local state using **Redux Persist** and **AsyncStorage**.

Tech: React Native, Expo, TypeScript, Redux Toolkit, Redux Persist, AsyncStorage, Expo Router, Expo Local Authentication, Styled Components, Sentry

DeFiApps — Multi-Module DeFi Ecosystem | LINK — Sepolia Testnet

- Built a full-stack DeFi platform covering **AMM swaps**, **yield farming**, **staking**, **lending**, **over-collateralized loans**, and **multisig treasury management**.
- Deployed four Solidity smart contracts to Ethereum Sepolia; implemented **2-of-3 Gnosis Safe governance**, **health-factor monitoring**, **liquidation-risk signals**, on-chain listeners, **Fastify/Redis services**, and React dashboards.

Tech: Solidity 0.8.24, Hardhat, OpenZeppelin, Ethers.js v6, Gnosis Safe, Fastify, Redis, React, Material UI

NFT Nexus — Multi-Chain Real-Time NFT Marketplace | LINK — Solana Devnet & Sepolia

- Built a **multi-chain NFT marketplace** supporting discovery, portfolio management, analytics, trading, resales, and administration workflows.
- Integrated **Solana Devnet** using **Anchor/Rust** and **EVM Sepolia** with creator royalties; implemented **NATS JetStream**, **Fastify WebSockets**, indexer lookback, signature idempotency, **IPFS/Pinata**, and **Arweave/Irys storage**.

Tech: Solidity, Rust, Anchor, Foundry, React, Vite, Fastify, NATS JetStream, PostgreSQL, Redis, WebSockets, IPFS, Arweave

AWARDS & RECOGNITION

- **Top 15** — Startup World Cup, Las Vegas, USA | 2026
- **Award of Merit** — International Blockchain Olympiad (IBCOL) | 2024
- **Finalist and Honorable Mention** — Bangladesh Blockchain Olympiad | 2023, 2024
- **1st Runner-Up** — Spark Business Competition | 2024
- **2nd Runner-Up** — Business Idea Competition | 2023

EDUCATIONAL QUALIFICATIONS

Bachelor of Science in Computer Science and Engineering — Daffodil International University | Apr 2021 - May 2025 | **CGPA: 3.33 / 4.00**
